

# React 18 migration guide for "Facit"

The "react" version is set to "18.0.0" in the "package.json" file, but it works like "React 17" if you don't make the following changes in the "src/index.js" file.

```
src/index.js

```

src/index.js

 The hooks that come with "React 18" are not used in the project, so it's easy to switch between versions with just this change.

 You may encounter problems as it is very new. If you send us your questions, we will try to help as much as we can.
